Arora Technologies   01/08/2023 - present

Javascript developer

FradX   05/03/2023 - 25/07/2023

Associate Software Developer

Rapid Innovations   08/11/2021 - 02/03/2023

PROJECTS

Art official
- A NFT market place project, developed using Reactjs and Styled Components. Integrated 3D models as NFTs, enhancing the marketplace's visual and interactive features.

Jungle (OpenSea Clone)
- Developed the user interface for an NFT marketplace using HTML, CSS, JavaScript, and Next.js. Utilized Styled Components to create reusable and dynamic styles, ensuring a responsive and visually appealing layout. Optimized components for performance, improving load times and user interactions. Ensured cross-browser compatibility and adherence to UI/UX best practices.

White Label
- A NFT market place project, Built using Nextjs, Styled Components, Chartjs, Formik, Yup, React Table and React Slick.

Bullseye
- Developed a dynamic event management system enabling administrators to create events and assign them to managers, streamlining event coordination and oversight.

Wedo Laundry
- Developed and maintained an efficient online laundry and dry cleaning service platform using React.js, ensuring seamless pickup and drop-off operations, user-friendly interface, and high customer satisfaction with timely delivery.
